

Micronair's 'EC' range

High performance

Low investment

VIBRA-CLEAN

4 or 8 cartridge filters in short & tall versions - covering a big range of airflow demands.

Huge filter areas 34 to 136 square metres but in an extra compact footprint.

Super clean filtering down to 1 micron - that's 1000th of a millimeter!

Choice of fans to suit your situation - from 5.5 to 18.5kw delivering air volumes from 3200 to 20,000 cubic m per hour.

Convenient Wheelie Bins with quick release cam lock no more difficult and messy bags to empty

Auto filter cleaning at shutdown with variable intensity and duration.

Designed & built in Australia with heavy galv steel and powder coating.

Washable spun bond polyester filters delivers long filter life.

Clever 'expansion chamber' design efficiently separates heavy from fine dust.

Tall filter version

Auto 'soft start' star delta starter in separate control cabinet.

Options: Outside' kit, Silencer, VSD and larger waste bins
