

## VC8S

Compact height  
Perfect for tight spots.

The VC8S includes **ALL** the design features and advantages of our larger VC models (see VC range brochure for details) However with its 'half height' filter cartridges and compact footprint it's ideal for tight spots & lower volume applications. Great value too!

*Reduced height Bins, Larger Dump Bins and a wide choice of motor & fan combinations with power saving options make the VC8S even more versatile and effective.*
